

**MINUTES of the First Day of the Garden  
Executive/Organisms Democracy Berlin Osloer Str.**

**29th September 2019,  
Osloer Str 107/108, 13359 Berlin**

Elected members of the Garden Executive:

SELIGER, Ingo  
RAMSAY-SONNECK, Marianne  
PONCE, Paz  
ACKERMANN, Volker  
CHETVERTKOVA, Evgenia  
RICHARDS, Aurelie

Collaborators on site: 7 individuals from the group of visitors actively participated

Technical Direction: Mathias Lenz, Club Real

1. The Executive launched at 11:00 am with minority protection measures for the citizens of the Linden tree, Ash, Oak, Field Maple, Hazelnut, Rowanberry, Chickweed, Lilac, Snowball and Sloe (resolution 2 of the Parliament of Organisms of 14.09.2019, submitted by European Spindle Tree *Euonymus europaeus* Volker Ackermann).

The more competitive and therefore dominant citizens of Norway maple, Maple and Robinia have been cut to the biennial wood where they shade and oppress the minorities. The measures were carried out by Ingo Seliger, Volker Ackermann, Georg Reinhardt, Mathias Lenz and 2 visitors, but could only be partially implemented due to heavy rain and the theft of a ladder. They are to be continued during the winter to allow even more light, in particular by removing the lower branches of the most competitive and largest citizens.

2. The irrigation of the people's rule in the garden (parliamentary resolution 5 of 14.09.2019 to support the citizens in the management of climate change, introduced by Sycamore Maple Tree *Acer pseudoplatanus* Joseph Jelemani) was postponed as a result of the heavy rain to spring. In order to ensure the proper implementation of the measure, Parliament will be informed about the frequency and duration of irrigation.

3. The support measures for a habitat for Solitary Mining Bees (Parliament resolution 10 of 14.09.2019, introduced by Early Mining Bee *Andrena haemorrhoa* Aurelie Richards) were carried out by Aurelie Richards in the western roadside strip by adding sand and gravel to the top soil layer.

4. G. Reinhardt informed about the status of naturalization procedures for the threatened species Fern *Dryopteris liliata* from Georgia and Beetle *Tarphius rufonodulosus* from the Azores (Parliamentary Decisions 9 of 14.09.2019, introduced by the Immigration advocate Leonhard Grimm) The immigration lawyers have contacted and

asked for support from various farmer companies in Europe, and obtained information from the Department of Natural Resources about the legal possibilities of accepting endangered species.

5. The opportunity to participate in the design ideas - competition (measure according to parliamentary resolution 11, introduced by Mahonia Mahonia auqifolium Paz Ponce) for a monument to the neobiota - since 1492 immigrated species - who have played an essential role in repopulating war and post-war destroyed habitats was used by many visitors. The results will be presented to Parliament during the 2nd Session of Parliament on May 2020.

6. The naturalization / planting of 6 new citizens (2 cornelian cherries, 2 copper pear bulbs, 2 common hawthorns), purchased by the Executive at a so-called organic tree school and delivered by mail, was carried out by Paz Ponce and Evgenia Chetvertkova with the spontaneous help of various visitors. The pear trees and cornelian cherries were planted in the Eastern area near the border to the garage park in an area currently mainly inhabited by nettles and hops. The hawthorn was planted in the northeast, where, due to the building of the solar energy system, a vacant site was created and also planted in the southeast on the border to the supermarket area between Ash Leaved Maple Trees. The new citizens are to provide berry food for flying vertebrates. (Measure according to parliamentary resolution 12, introduced by Great Tit Parus major Sedat Michaelis - presented by Dr. Hannes Anbelang substituting for the absent Sedat Michaelis)

The implementation of housing for birds (another measure from the above proposal), was postponed because of the heavy rain and should take place before the spring.

The work of the executive was ended at 14:00.
